

RESORTDECK

QUALITY CAPPED RECYCLED COMPOSITE
/// WITH ULTRASHIELD TECHNOLOGY

As with all Outdure products, ResortDeck attributes include durability, style, and ease of maintenance. Engineered with UltraShield technology, ResortDeck has a stunning finish akin to interior floorboards. Made of recycled wood fibers and recycled polymers, the range comes in six contemporary colours.

RESORTDECK

ResortDeck combines the natural beauty of a freshly oiled timber decking with the extra benefits of durability, dimensional stability and easy care properties. The core is 95% recyclable materials: 35-40% high density polyethylene and 60-65% wood fiber. The co-extruded polymer layer protects from moisture.

ResortDeck has superior UV protection, fade and mould resistance. The boards are splinter-free, do not leech, the need for staining, oiling and painting is eliminated. The subtle colour variation is the result of a colourmix technology making every board unique. Available in six natural colours to complement all architectural styles.

Lay uniformly with breaker boards or a staggered board which reduces waste and looks more like a natural hardwood deck layout. Outdure's patented hidden QwickClips easily hold the boards into place.

Please refer to actual decking samples for accurate colours and texture.

KEY BENEFITS:

- UV resistant
- Durable & recycled
- Capped technology
- Moisture resistant
- Stain-resistant
- Splinter-free
- Nail-free
- Minimal fade
- Bal 29 fire rating
- Hidden fasteners
- Termite & pest proof
- X6 matte colours
- Easy maintenance
- Commercial warranty
- Residential warranty

BOARD SIZES

138x23x2800 / 4800mm

TRIM BOARD

180x15x2800mm

QWICKGRATES

138x23x2800mm

For ventilation + access

6063-T6 Aluminium

Matt Black / Silver Finish

THE PROCESS IS EASY:

- Select a colour
- Share your plans or, measure the size and shape of your deck

INSTALL RESORTDECK ON A TIMBER SUB-FRAME OR, ON OUTDURE'S QWICKBUILD DECK FRAME SYSTEM

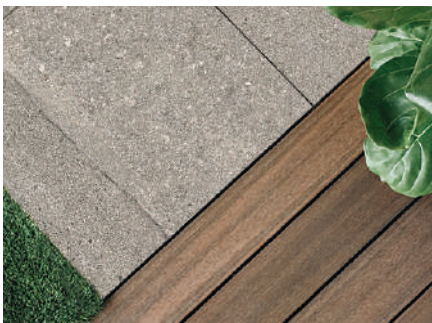

Composite decking is easy to install and compatible with both a timber frame or QwickBuild which provides a strong, durable, stable structure to support decking, tiles and/or turf over waterproofed areas, ground, concrete slabs and existing tiles or pavers using hidden interlocking fastenings.

The versatile system comprises of a comprehensive range of patented profiles, fastening and support components and accessories. The framework is made from lightweight marine-grade, structural aluminium. Components include brackets, clips, anchors, fasteners, access and ventilation grates, adjustable height pedestals. Installation time is significantly reduced, the profiles are value-engineered with long-span capability and minimal waste making it cost-effective.

QwickBuild also enables flush internal and external floor levels and the construction of complex decks, including stairs, seats, screens, and curves. Outdure provides a design service including technical advice, concepts and production drawings.
